COLLOIDS AND SURFACES A

Subject Index

Acidic sites 279
Adsorbed ozone 153
Adsorption 21, 187, 227, 239, 279
Adsorption isotherm 227
Adsorption preference 113
Air/water interface 187
Alcohols 211
Alkylbenzyldimethylammonium chlorides 107
Alumina 211
Alumina–silica 279
Anionic species 39
Anionic surfactant 77

Barium oxide 233
Barium peroxide 233
Benzethonium bromide 261
Benzethonium chloride 261

Carbon adsorbents 227
Chemical flooding 87
Chromium aluminophosphate-5 137
Clusters of water molecules 227
CMC 159
^{13}C NMR spectroscopy 199
Competitive adsorption 77, 113
Conductivity 107, 147
Contact angle 239
Controlled hydrolysis 123
Critical micelle concentration 103
Crude oil 1

Dealumination 199
Diffusion coefficient 159
Dimethylsiloxy groups 217
Dissolution 39
DLVO theory 29
Dynamic light scattering 107
Dynamic simulation 279

Electrophoretic mobility 51
Emulsion 51
Equilibrium wetting 245

Film 207
Frontal gel chromatography 159
Fulvic acids 129

β-Lactoglobulin 77
Gelatin 77
Gel permeation chromatography 159

Heat of adsorption 227
Hematite 21
Hydrosilylation 29

Inelastic light scattering 159
Interactions 77
Interfacial tension 251
Internal volume of vesicles 9
In vitro model 9
Ionic strength 51
Ionic surfactants 187
IR spectra 153
IR spectroscopy 199

Kinetics 21

Ligand effect 39
Light scattering 159
Limestone 239
Lipid optimization 9
Liquid-phase oxidation 137
Local density of electron states 279
Luminescence 207

Marine microlayer 129
Mesopore surface 227
Metal surfactants 63
Methylsilica 211
Micelles 107

Micellization 147
Microemulsions 63
Mixed of surfactant 239
Modification 123
Modified fumed silica 217
Molecular sieves 179

Nanoclusters 63
Nion-ionic surfactants 103
Nonionic surfactant 77

Oil recovery 87

Permeability reduction 51
pH 51
Polyacrylamide 21
Polymer 87
Polyphenylsulfonates 147
Polystyrene latex 113
Porous media 51
Positron annihilation lifetimes 233
Pyrite 39
Pyrogenic silica 123

Quantum-sized semi-conductors 63
Quantum chemical simulation 287
Quantum chemistry 279
Quaternary ammonium group 29
Quenching 207

Radiofrequency effect 99
Relaxation process 287
Reversed micelles 63
Rheology 1

Selective catalysis 137
Silica 211, 287
Skin lipid bilayer 9
Small-angle X-ray scattering 261
Sodium-*n*-alkyl sulphates 187
Sol–gel 207
SOS model 245
Specific surface 227
Standard redox potential 39
Static light scattering 261
Surface interactions 217
Surface reaction 199
Surface shear rheology 129
Surface tension 129 251
Surfactant 87 239
Suspensions 99

Ternary polymer solution 113
Thermally stimulated depolarization 287
Titania 279
Titania-silica 123
Titanium zeolite beta 137
Transmission electron microscopy 9

Ultramarine 179
Uncharged polymers 113

Vesicle-forming surfactants 251
Vesicle size distribution 9

Water adsorption 233
Water vapour 227
Wetting 211

Zeolite 179, 199
Zeta potential 29
Zeta potentials 99
Zwitterions 159
